Confirm the surface you will be mounting the charger to is adequate in strength and thickness to hold the charger in place with the mounting screws you have selected. Suggested mounting screws are stainless steel pan head metal screws #10 X 1" (not supplied).

Tape to mounting location to mark or drill holes.

CAUTION
Prior to drilling holes be aware of wire harness, fuel line and fuel tank locations. Leave adequate space for airflow behind and around the unit. Do not mount on a carpeted surface as it may block the airflow across the back of unit. Please read owner's manual prior to installation.
