Great White 
SALTWATER

THE OCEAN KNOWS NO BOUNDARIES, NEITHER DO I.

There's no trolling motors on the planet more prepared for the extreme test of saltwater than Great White. Heat? Corrosion? Big-water pounding? All in a day's work for these predators. Our Great White edition is the choice of guides, competitive anglers, and die-hards around the world. From the specially formulated coating, to the epoxy-sealed lower unit, to the Stainless Steel shaft – the durability starts on the outside and goes all the way to the core. Great White. The only motor ready to go the distance with you in one of the most caustic environments on earth. **DIGITAL** &

DIGITAL &

EATIN' UP THE ULTIMATE TEST. Shallow-water saltwater guides and anglers on the Saltwater Redfish circuits choose Great White Digital for a simple reason – they're the most dependable trolling motors out there. Long days on the flats are the ultimate test of your equipment, and these motors don't just pass it, they eat it up and come back for more. MotorGuide invented the saltwater-specific trolling motor and we continue leadership today as the choice of guides and avid saltwater anglers around the world.

MOTORGUIDE DIGITAL monitors your motor's amp draw, heat dissipation, output and other vital parameters. The result is a motor that self-regulates – a cooler, more durable running motor with an extended service life. It is a self-contained, sealed module in the lower unit that brings all vital motor components together in one protected location, eliminating outdated analog circuit boards and related componentry.

UPGRADE TO THE GREAT WHITE MACHETE® III GLASS-FILLED PROPELLER. Go faster, go shallower, go quieter with MotorGuide's specially formulated material that's stiffer and more rugged. Get the durability that the pros demand. *Sold as an option.*

Model	Part No.	Peak Thrust	Shaft	Volts	Speed Control	Mount Style
Hand Control Bow						
SW82 HB	924410050	82 lbs.	50"	24	Variable	Gator Breakaway 21 or 24R

FEATURES

Digital power in 82 and 105 pounds of thrust with 24- or 36 volt power options

Ultra pure aluminum coating "self-heals" from scratches providing added protection in abrasive shallow water use

Stainless Steel shaft, fasteners and control cables

Anodized aluminum mounts and components prevent galvanic corrosion through our specialized multi-step process

Completely sealed Digital module is protected from heat, moisture, corrosion and shock, greatly improving durability

Improved efficiency results in extended battery life and more time on the water

Soft-start feature ramps up power, creating smoother initial motion

Quiet, smooth operation lets you get closer to the fish

Machete III propeller is quieter and has a smaller diameter than two-blade designs for ultimate shallow water performance

Compact, lightweight lower units

Dual saltwater anodes for added corrosion protection
