**TOUR**  
EDITION

# DOES EVERYTHING BUT PULL THE FISH FROM THE WATER.

Is the trolling motor really one of the most important pieces of equipment on your boat? It is when your livelihood depends on it. At MotorGuide, we understand what's most important to our users. It comes down to whether or not your trolling motor performs. It's that simple. Trolling professionals are always looking for an edge, and with MotorGuide's Tour Edition, they've found it. Every Tour model combines the Digital advantage with our Stainless Steel shafts, metal pedals and heads. Digital allows you to dial into the precise speed you are searching for, and in turn results in longer lasting battery life. Our trolling motors are more than tough, they're virtually indestructible. That's the Tour difference. Only from MotorGuide. **DIGITAL &**

## FEATURES

Stainless steel shafts and components, metal head, and pedal make this the toughest trolling motor ever

Digital power from 75 to 105 pounds of thrust with 24 or 36-volt options

Completely sealed Digital module is protected from heat, moisture, corrosion and shock, greatly improving durability

MotorGuide Digital efficiency results in sustained battery life and more time on the water

Soft-start feature ramps up power, creating smoother initial motion

Quiet, smooth variable-speed operation lets you get closer to the fish

Machete III Prop runs quiet and has a smaller diameter than two-blade designs for the ultimate shallow water performance

Push-pull adjustable steering with stainless steel pulleys is known for its feel and precision, limiting torque and fatigue

Compact, hydrodynamic, lightweight lower units

MicroSwitch is designed to withstand the demands of harsh, wet tournament conditions

Gator Spring Mount features extruded aircraft aluminum for rock-solid durability. A spring return linkage makes underwater obstacles a thing of the past

20.8 Gator Breakaway mount features a center decklet and a hinged door for easy motor removal

**MOTORGUIDE DIGITAL** monitors your motor's amp-draw, heat dissipation, output and other vital parameters, resulting in a cooler-running, more durable motor with an extended service life. Digital is a self-contained, sealed module in the lower unit that brings all vital motor components together in one protected location, while eliminating outdated analog circuit boards and their related components.

**CAPTURE EVERY DETAIL** with HDS, the latest fishfinding technology from industry-leader Lowrance. Features built-in Broadband Sounder for crystal-clear clarity to spot more targets and keep the livewell full.

HDS available only from Lowrance.

Adaptable for leading sonar brands. Tour sonar is designed to provide clean, clear signals for the leading brands of sonar. Please visit [www.motorguide.com](http://www.motorguide.com) for more information.
